

WAS 1124 DD L/P W150DD Series LED Rear Combination Light with Reverse & Dynamic Indicator (Fly Lead) 12/24V

W150DD is a modern LED rear lamp with the unique shape of a position light and dynamic indicator. The LED position lamp modules are made of a special compound thanks to which the particular lightning points are not visible and it is only possible to see the shape and is pleasant to the eye glow with a neon-like effect. Dynamic indicator brings light moving effect heading towards the direction of turn, when each of 8 led lights up with a delay. The lamp can be used in working voltage 12V and 24V. It is EC, EMC approved and it is also rated for IP 66/68. These are probably the best-looking lamps available on the market.
